Nuclear Engineering and Design 140 (1993) 425–427
North-Holland

Contents of Volume 140

CONTENTS OF ISSUE 140(1)

Publisher's Note ix

**Extended and Updated Selected Papers
from the SMiRT-11 Post-Conference Seminar No. 4 on
CONTAINMENT OF NUCLEAR REACTORS
Shanghai, People's Republic of China, August 14–16, 1991**

Preface, *A. Marchertas, R. Krieg and A. Huber* xi

Session 1. Different Containment Concepts

Recent advances in concrete containment vessels in Japan, *T. Kuroda, T. Ebine, S. Sato and M. Kato* 3

Containment design for the Advanced and Simplified Boiling Water Reactor standard plants, *P.F. Gou, H.E. Townsend, P.S. Sawhney, K. Mandagi and N.B. Duchon* 19

Containment concepts for High Temperature Reactors, *J. Altes* 27

Containment for the Low Temperature District Nuclear-Heating Reactor, *H. Shuyan and D. Duo* 33

Can the acceptance of nuclear reactors be raised by a simpler, more transparent safety concept employing improved containments?, *R. Krieg* 39

Session 2. Hydrogen Distribution in the Containment under Severe Accident Conditions; Hydro Carbon Fire in the Containment

Hydrogen distribution tests under severe accident conditions at the Large-Scale HDR-facility, *L.A. Valencia* 51

A UK analysis of light gas distribution experiment E11.2 in the HDR facility, *P.N. Smith and P. Ellicott* 61

The use of the COMPACT code for calculation of long term environmental effects as a result of high temperature discharges into confined areas, *I.M. Coe and D.B. Utton* 69

Session 3. Hydrogen Explosion and Detonation

Effect of initial conditions on combustion generated loads, *S.R. Tieszen* 81

Conservative estimates for dynamic containment loads from hydrogen combustions, *W. Breitung* 95

Study on the structural analysis of the containment and the hydrogen detonation problem under severe accident conditions, *Z. Zhang and X. Yang* 111

Structural response of a nuclear power plant steel containment under H_2 detonation, *G. Maresca, P.P. Milella and G. Pino* 119

Announcements
Seminar on Modern Developments in Boiling Heat Transfer and Two-Phase Flow 127
International Conference on Welding and Melting by Electron and Laser Beams 128

Instructions to contributors 129

CONTENTS OF ISSUE 140(2)

Engineering Mechanics, Structures and Materials
The propagation and reflection of thermal stress waves in anisotropic nonhomogeneous hollow cylinders and spheres, *N. Sumi and Y. Ito* 133
Functional tests of French safety valves, type SEBIM, for their fitness for use in the primary system of German pressurized water reactors, *H. Stepan and G. Amon* 147
Uniaxial true stress–true strain curve for a ductile metal, *W.Q. Shen and N. Jones* 153

Thermal-Hydraulics and Related Safety
Prediction of coupled heat and mass transfer in the Fast Reactor cover gas: the C-GAS code, *Y.L. Sinai, I.J. Ford, J.C. Barrett and C.F. Clement* 159
Experimental examinations of the 2D-thermal-hydraulic code FRECON for single phase natural convection flows in complex structures, *M. Bürger, J. Unfried, M. Buck, R. Kulenovic, S. Rösler, M. Groll and A. Schatz* 193
A phenomenological model of the thermal hydraulics of convective boiling during the quenching of hot rod bundles.. Part III: Model assessment using Winfrith steady-state, post-CHF, void-fraction and heat-transfer measurements and Berkeley transient-reflood test data, *C. Unal, E. Haytcher and R. Nelson* 211
An adaptive finite element model for the behaviour of uranium hexafluoride filled container in a fire, *R.W. Lewis, Y. Zheng and D.T. Gethin* 229

Reactor Engineering, Waste Technology, Instrumentation and Control
Preliminary design study of the ultra long life fast reactor, *Z. Su'ud and H. Sekimoto* 251
The HTR with SiC-technology, *R. Schulten* 261
The effects of chemical concentration on liquid waste evaporation from the Melton Valley Storage Tanks (MVSTs) system, *D. MacGrath, G. Yang and M.A. Ebadian* 269

Technical Note
Safety of Ukraine's NPPs, *A. Velikovsky* 285

List of Reviewers 287

Instructions to contributors 293

CONTENTS OF ISSUE 140(3)

Extended and Updated Selected Papers presented within Division E at the SMiRT-11 Conference on INELASTIC BEHAVIOR OF SOLIDS AND STRUCTURES Tokyo, Japan, August 18–23, 1991

Preface, *Y. Asada* i

Three-dimensional analysis method for sloshing behavior and its application to FBRs, *K. Amano, R. Iwano and Y. Sibata* 297

Seismic behavior of a free-standing core in a large LMFBR, *M. Morishita and K. Iwata* 309

Outline of the seismic buckling design guideline of an FBR – a tentative draft, *H. Akiyama, H. Ohtsubo, H. Nakamura, S. Matsuura, Y. Hagiwara, T. Yuhara, H. Hirayama, K. Kokubo and Y. Ooka* 319

Experimental and computational simulation for natural circulation in an LMFBR, *H. Takeda, T. Koga and O. Watanabe* 331

Advanced evaluation of thermal ratchetting of FBR components, *T. Igari, S. Kitade, M. Ueta, M. Ichimiya, K. Kimura, Y. Satoh and K. Take* 341

Creep-fatigue failure test and analysis of a vessel-type structure subjected to cyclic thermal transients, *N. Tanaka, K. Watashi, H. Umeda, M. Kikuchi and K. Iwata* 349

Regular Papers

Full-scale aircraft impact test for evaluation of impact force, *T. Sugano, H. Tsubota, Y. Kasai, N. Koshika, S. Orui, W.A. von Riesemann, D.C. Bickel and M.B. Parks* 373

Local damage to reinforced concrete structures caused by impact of aircraft engine missiles. Part 1. Test program, method and results, *T. Sugano, H. Tsubota, Y. Kasai, N. Koshika, H. Ohnuma, W.A. von Riesemann, D.C. Bickel and M.B. Parks* 387

Local damage to reinforced concrete structures caused by impact of aircraft engine missiles. Part 2. Evaluation of test results, *T. Sugano, H. Tsubota, Y. Kasai, N. Koshika, C. Itoh, K. Shirai, W.A. von Riesemann, D.C. Bickel and M.B. Parks* 407
